TECH STACK

BACKEND

- PHP
- Laravel
- Lumen
- CakePHP
- Node.js
- NestJS
- Python
- FastAPI

FRONTEND

- Vue.js
- Nuxt.js
- React.js
- Next.js
- jQuery
- LiveWire
- Tailwind CSS
- Bootstrap

DATABASE

- MySQL
- PostgreSQL
- MongoDB
- YugabyteDB

DEVOPS & CLOUD

- Docker
- Kubernetes
- Nginx
- AWS
- CI/CD
- Git
- RabbitMQ
- Redis
- Terraform

PRACTICES

- REST API Design
- Microservices
- API Security
- Agile
- JIRA
- SDLC

AI & LLM TOOLS

- Claude Code
- Claude API
- ChatGPT
- Gemini
- GitHub Copilot
- OpenAI API
- Prompt Engineering
- LLM Evaluation Pipelines
- AI Agent Development

EDUCATION

B.Sc. in Computer Science & Engineering

CGPA: 3.48 / 4.00

University of Development Alternative (UODA)
Dhanmondi, Dhaka-1207
2017 – 2021

Senior Software Engineer with nearly 5 years of experience building and owning production systems end-to-end — from API design through frontend delivery. Expert in Laravel, Python, Vue.js, and NestJS. Shipped major national government platforms (RAJUK EPMS, BTRC-LIMS, Ministry of Land) serving millions of citizens, fintech integrations (bKash, Sheba Pay), and a live AI voice agent product. Daily user of Claude Code and GitHub Copilot.

WORK EXPERIENCE

AI Developer (Freelance / Contract)

Jan 2026 – Present

Luminous Labs BD · Dhaka, Bangladesh

- Built voicenimble.com — a live AI voice agent platform — end-to-end using Claude API, Node.js, and Vue.js; owned full feature lifecycle from API design through production deployment.
- Designed and ran LLM evaluation pipelines to test AI outputs, triage failures, and ensure voice agent reliability across diverse real-world inputs.
- Uses Claude Code and GitHub Copilot daily to direct agents, critically review outputs, and accelerate delivery across multiple concurrent projects.

Software Engineer

Jan 2025 – Dec 2025

Sheba Platform Ltd · Dhaka, Bangladesh

- Owned features end-to-end — integrated Sheba Pay and bKash payment gateways with secure backend APIs handling thousands of daily transactions.
- Migrated legacy Laravel 5.2 codebase to Laravel 10; improved performance, security, and maintainability across customer app, admin panel, and partner portal.
- Resolved N+1 query issues and implemented Redis caching, significantly reducing response times on high-traffic endpoints.

Software Engineer

Jul 2022 – Dec 2024

Business Automation Limited · Dhaka, Bangladesh

- Engineered major national government platforms — RAJUK EPMS, BTRC-LIMS, Ministry of Land Mutation — serving millions of citizens across Bangladesh.
- Integrated Gplex Call Center API, national payment gateways, OSS framework, and biometric fingerprint authentication for RAJUK.
- Built with Laravel, NestJS, Vue 3, Vuex, Tailwind CSS; optimized large government datasets and complex multi-table queries.

Junior Software Engineer

Aug 2021 – Jun 2022

Innovation IT · Dhaka, Bangladesh

- Developed web applications using PHP (Laravel), jQuery, and AJAX for e-commerce and business clients.
- Converted mockups into responsive interfaces; deployed to live servers and conducted cross-browser testing.

PROJECT HISTORY

VoiceNimble — AI Voice Agent

Live AI voice agent platform with real-time conversation handling and LLM API integrations.

Claude API Node.js Vue.js
