Tech Stack

- **Backend:** PHP, Laravel, Lumen, CakePHP, Node.js, NestJS, Python, FAST API, ML.
- **Frontend:** Vue.js, Nuxt.js, React.js, Next Js, jQuery, LiveWire, Tailwind, Bootstrap.
- **Database:** MySQL, PostgreSQL, MongoDB, YugabyteDB.
- **DevOps:** Docker, K8s, Nginx, Linux, Mac, AWS, CI/CD, Git, RabbitMQ, Redis.
- **Integration:** Payment gateway - Bkash, Sheba Pay.
- **Implementation:** gPlex call center, Fingerprint device, Keycloak.
- **Other:** REST API Design, Microservices, Queue Systems, API Security, Agile SDLC, JIRA.

Education

2017 - 2021

B.Sc. in Computer Science & Engineering (CGPA-3.48)

University Of Development Alternative (UODA), Dhanmondi #27, Dhaka-1207.

Professional Skills

- Ownership & responsibility.
- Leadership & team coordination.
- Project management.
- Sprint planning.
- Event/tour planning.

Full-Stack Software Engineer with 4+ years of experience building scalable enterprise systems, high-traffic platforms, and government applications using Laravel, Vue.js, Nuxt.js, Node.js (NestJS), and modern DevOps tools. Strong expertise in backend API design, SQL optimization, legacy system migration, and microservice-based architecture. Delivers clean, secure, production-ready code with strong debugging and performance-tuning skills.

Work Experience

Jan 2025 - Present
Software Engineer
Sheba Platform Ltd

- Integrated fintech payment gateways (Sheba Pay, bKash) and implemented scalable, secure backend services with API-driven architecture.
- Migrated and refactored legacy Laravel 5.2 modules to Laravel 10, improving performance, security, and maintainability.
- Worked across Sheba's 3-tier ecosystem — customer app, admin, and partner portal — delivering new features and optimizations.
- Implemented push notifications using Firebase tokens and topics.
- Optimized APIs, database queries, and high-traffic endpoints; resolved N+1 issues and added Redis caching.
- Built modular frontend components using Nuxt.js & Vue.js.
- Applied DevOps practices: Docker, Nginx, CI/CD pipelines, AWS deployments, Kubernetes, Terraform, and Git version control.

Jul 2022 - Dec 2024
Software Engineer
Business Automation Limited

- Developed major government systems: [RAJUK EPMS](#), [BTRC-LIMS](#), [Ministry of Land Mutation](#), serving millions.
- Integrated Gplex Call Center API, payment gateways, and OSS framework; implemented fingerprint authentication (RAJUK).
- Worked with Laravel, Node.js (NestJS), Vue 3, Vuex, Tailwind CSS; optimized large datasets, queries, and APIs.
- Applied Machine Learning with NumPy, Pandas for workflow automation.
- Modernized legacy systems using Docker, RabbitMQ, caching, and queue workers; participated in government client meetings to gather requirements.

Aug 2021 - Jun 2022
Jr. Software Eng.
Innovation IT

- Developed web applications using PHP (Laravel), jQuery, and AJAX.
- Converted mockups into responsive web interfaces with HTML, CSS, JS, and PHP.
- Conducted testing and review for responsiveness and usability.
- Deployed websites to live servers and worked on e-commerce projects.

Project History

Marketing Olympiad

Built a multi-round competition platform with time-based scoring using Laravel and MySQL.

AmarParcel Delivery System

Developed a Foodpanda-style delivery and tracking system using Laravel and jQuery.

Pharmacy Management System (POS)

Created a full Pharmacy POS with inventory, billing, and reporting using Laravel.
